2. Please explain why this project could not be bid using the city's traditional bid process and the need to use JOC Procurement system.

Project is time sensitive. Urgency and efficiency is required to complete this project during the 2009 Spring construction season due to the existing conditions being a public hazard. This can best be managed via the JOC system.

3. If the project is a one trade project, please provide additional explanation of why it would be in the city's best interest to do the project under JOC:

Not applicable various trades involved.

4. If it is anticipated that over 25% of the project will consist of Non-prepriced items, please provide an explanation on why JOC should be used.

N.A.

5. If some elements of the proposed JOC project scope of work are covered by city term agreements, explain why they are included in this JOC project instead of being procured through the term agreements.

The use of JOC would assist in the management and implementation of this time sensitive project. The Aldermen in these wards requested a quick turnaround on these repairs, and there are no term agreements for these items available. Finally, there are no other methods other than JOC to procure the above items.
